Microsoft Windows 8 Hackaton candidate (2012)

9th INAICTA (Indonesian ICT Award) nominee (2015)

EXPERIENCE

MALIFAX TECHNOLOGIES (S) PTE LTD

Senior Android Developer (Dec 2015 – Current)

CELL (+62) 8788-1366177 • E-MAIL hendraanggrian@gmail.com • WEB hendraanggrian.github.io

Started collaborating with graphic designers to enhance UI/UX. Has been given more resources to continue write native applications. Stopped maintaining databases and other back-end operations to focus on front-end development.

SIMPLIFY-INC (PT. Simpling Tri Jaya) / Prodigy Infinitech

Android Developer (Mar 2014 – Dec 2015)

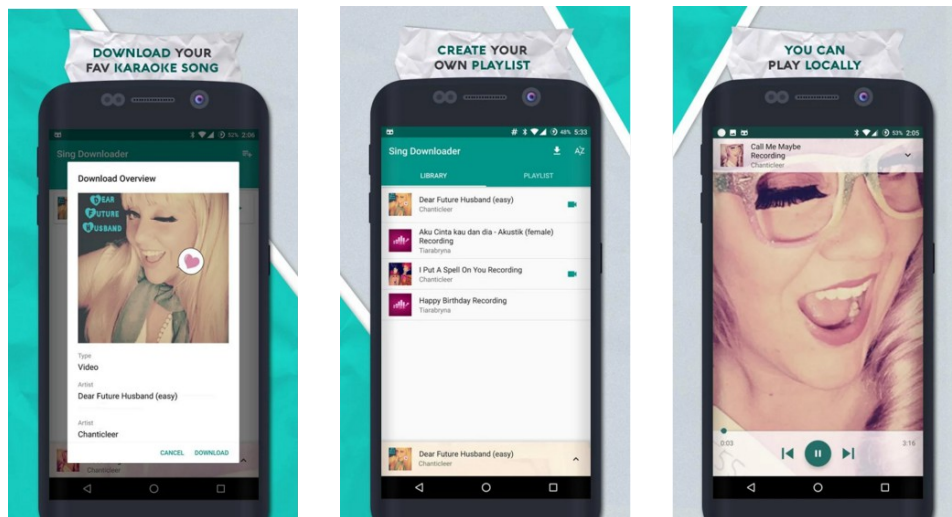

Started writing native Android and .NET applications with limited resources. Also managed multiple databases and database connections. Eventually resigned due to conflict of interests.

PROJECTS

Sing Downloader

An app built exclusively to download, play, and manage songs from SMULE, the biggest music-based social media. The app works by stripping down the entire HTML source code, even ones generated by javascript.

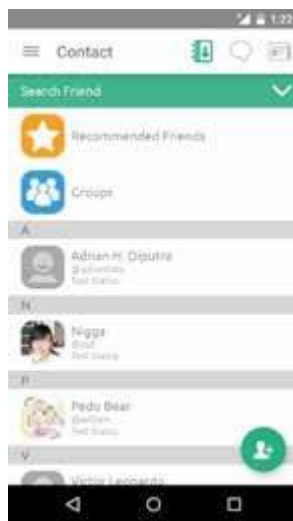

<https://play.google.com/store/apps/details?id=sg.com.malifax.singdownloader>

Ngobrol

Free messaging and voice call app highly integrated with Google Services and other open-source APIs and libraries. Using GCM (Google Cloud Messaging) as push technology as the highest dependency to exchange messages, while Sinch service is responsible for voice calling feature. Main feature of Ngobrol is the decision not to keep text-based chat records in server, therefore not only ensures users' privacy, but also lightweight to server. Although still in beta channel, this particular app has brought me a nominee in INACTA 2015, while also abusively used as a research in my undergraduate degree thesis.

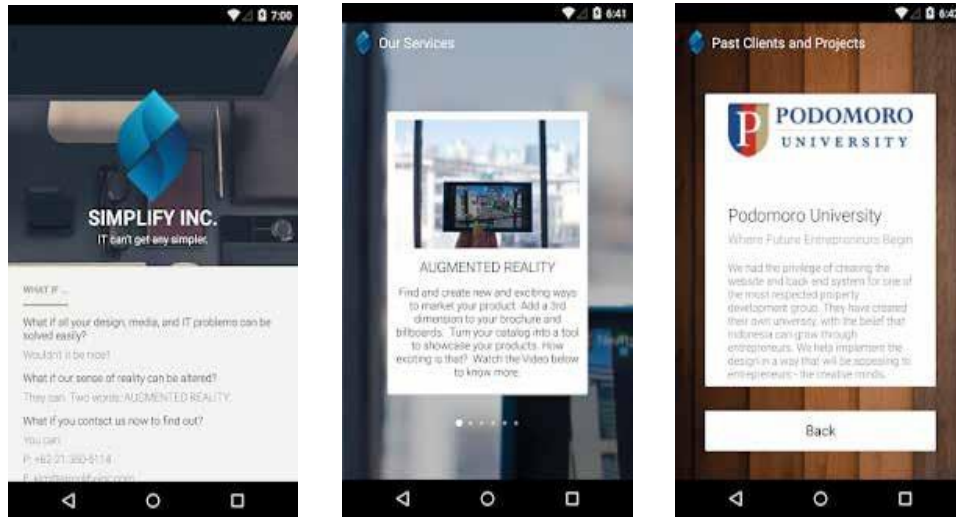

<https://play.google.com/store/apps/details?id=com.ngobrol.app>

SIMPLIFY-INC

Official marketing app from PT. Simplinc Tri Jaya

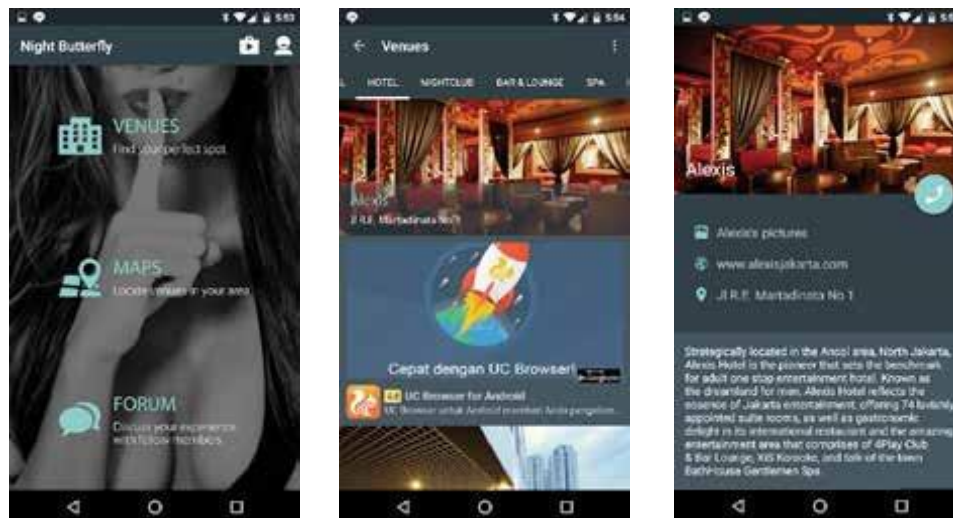

https://play.google.com/store/apps/details?id=com.simplify_inc.indonesia

Night Butterfly

Troublesome side project from PT. Simplinc Tri Jaya, Night Butterfly is like an encyclopedia for underground entertainment all around Jakarta. Although some venues listed in this app have repeatedly requested to take down this app, board members of Simplinc Tri Jaya have decided to release this app anyway. I no longer maintain the project.

Offset Printing Manager

Desktop software that was originally developed for personal business use. After almost 2 years of operating, receiving feedbacks from numerous volunteers,

and patching, this software now runs on some offset printing businesses in my environment.
